

Input to CG 02-278 - "All About the Message" petition to allow telemarketers and other entities to leave message on my voice mail whether it be my home voice or my cell voice mail.

Please do not allow this intrusion of my paid for voice mail service. They are not contacting me as a person to person communication rather they merely want to market. I have put all my numbers on the 'do not call list' so I have served notice that I do not want my phone numbers used for any kind of marketing, mass communication use of my telephones whether cable phone or cell phone. It is bad enough that my cell phone is inundated with calls which somehow do not obey or need to obey the 'do not call' but to further destroy the viability of the service which i pay for by allowing unsolicited intrusions of my chosen phone service.
